Construction Inspections Summary

This form is for routine site visits to construction sites. It is intended to be a quick method of documenting the site visit and status of compliance. It does not replace a full compliance inspection which should be conducted before, during and after construction (pre-NOT), or in response to a complaint, unfavorable Qualified Inspector weekly report, or if the site is deemed to be out of compliance during a routine site visit.

Date	Site	Compliant (Y/N)	Note (e.g. return for full inspection, review inspector reports, etc.)
